# Welcome to our 2023 catalogue!

Adults often forget that play is powerful, but it is the most encouraging force known to children.

It is through play that children push themselves, demonstrate abilities and achieve goals. Therefore no one young or old should be prevented from playing.

TFH have been overcoming obstacles to play for 35 years: we curate a catalogue that is translated into 8 languages, our partners distribute in 13 countries and the special needs toys we manufacture are sold in over 100 countries.

Please enjoy our catalogue, its design is aimed at guiding you to the right toy. Everyone is different, but many goals and difficulties are shared, we use those to group our range.

We hope that it will inspire you to get in touch, we need help to improve and we love to hear from you.

Auditory processing disorder (APD) or Auditory Hypersensitivity can affect people of all ages, but it often starts in childhood.

It can affect your ability to understand speech, distinguish sounds, and concentrate around background noise.

We provide a wide range of fun auditory toys to help explore and develop this important sense.

Look out for our Resonance selection which magnifies the vibration inherent in sound, enabling us to feel as well as hear sounds.

**Kibo**

Truly overcoming obstacles through play TFH are proud to present Kibo. So many electronic toys create annoying bleeps, while musical instruments require a trained operator. Kibo is a musical instrument designed to be played with like a toy. A true fusion of technology, musicology and fun. Kibo is light, tough and cutting edge technology from Italy. Engagingly simple, but fiendishly complex under the hood, Kibo presents 3 forms of music composition to the user through its 8 chunky wooden blocks. These lovely tactile shapes stack magnetically and snap into place on the smooth board pleasingly, and that's when the magic begins. Tap the blocks to play 40 different instruments (just turn the knob to change) in mode one - the harder you tap, the louder they play (it's a musical instrument). Build complex compositions by adding and removing the blocks in mode two - the lower 4 blocks build a bassline, the upper 4 build the harmony. Mode 3 is a combo mode, the top row builds up a melody, while the bottom row allows you to tap out an accompanying beat. Battery powered (~40 hours, recharges like a phone). Rechargeable non-replaceable Battery. • 30 x 23 x 2cm

**6KIBO**

*Kibo is of course Bluetooth-driven via app on an iPad (not included). The App (kodaly) is free to download & requires no musical training. Kibo is a true MIDI controller and can therefore be integrated into other (more complex) apps like Garage Band, Beat maker and Ableton. Some of these apps are free and quite easy to get into. We hope that while Kibo is engaging and educating to play, it will also be a gateway to the truly exciting world of music technology. Play up to 7 Kibos in a group from a single iPad (update in 2021 to allow remote online groups). This multiplayer feature is so simple to set up and use, it's "gold dust". Kibo requires an iPad or iPhone, headphones or a powered speaker for a performance.*

**Echo Chamber**

Sitting on this simple pliant platform is popular because it creates a dished surface on which things roll towards you, and any noise it makes rolling toward you resonates through your body. It will also resonate your voice back to you if you lie on it. • **120 x 120 x 10cm**

**9RSEC**

*Typically we think of music as being 'heard' by the ear, our most sensitive organ to the vibrations in the air. When the notes are very deep we also feel them with our body. Such vibration is the basis of Vibroacoustic therapy. The TFH Resonance Range magnifies musical vibrations so they are felt more easily. All Resonance items require an Amp, our Resonator Amp is perfect.*

**Resonance Cushion**

This Pillow packs a powerful punch. Use it in combination with any other resonance item for a stereo experience. Requires a Resonance Amp 9RSX, better with some Speakers 9SPKR. • **46 x 33 x 10cm**

**9RSCN****Resonance Crab**

Highly detailed and tactile character in heavy duty fabric with varying soft textures. Comfortable to relax on and bright enough to stimulate play, resonates with music. Easy care with removable washable covers. • **98 x 103 x 17cm**

**9RSCR****Resonance Beanbag**

A beanbag with a beat. The special speaker inside provides strong musical resonance. • **8 cubic feet**

**9RSCB**

Welcome to the TACTILE chapter!

Our skin is our largest sensory organ. Tickling labels and unfamiliar fabrics can be annoying, and particularly for those who are tactile sensitive.

We believe that exposure to new textures can be fun and that through controlled tactile play we can widen our senses and reduce unpleasant experiences.

Messy play is the ultimate tactile challenge and well worth the effort.

### Gravity Sand and Water Table

Highly accessible platform designed specifically to bring together our two most precious things: Children meet water. Shaped to enable seated or wheelchair users get under and "into" the space. Structured around features that enhance some of water's best qualities the Gravity S&W tray requires just 5 litres of water to activate. Riddled with features that encourage creative use of marbles, trains and particularly building blocks. The draining plug can be locked into place (requiring a tool).

**8HG20**

*Water: The most abundant substance on Earth and the source of all life.*

*Water is weird: its solid form floats on its liquid form (also essential for life on earth), but perhaps oddest of all... water is both safe and fun.*

*So children should study it and they love to play with it.*

**Inflatable Sensory Trays**

3 soft PVC low-sided trays with drain spouts for quick and easy exploration. • 55 x 42 x 8cm

**5SIST**

**Gelli Play**

12 Bags of powder each capable of converting 12 litres of water into Gelli. Use less water to make the Gelli more mouldable. Includes White, Green, Blue and Pink Powder. Convert Gelli back into water by adding salt (included). Eco and Child friendly. • 12x 50g bags

Develop your understanding of PROPRIOCEPTION in this chapter.

Proprioception makes up a large part of sensory therapy. But, what is it and how does it work? Proprioception is, essentially, an awareness of one's own body; its movement, balance and how all parts relate to one another.

Products in this section have been chosen for their ability to help with the concept of body awareness. Any product that encourages reaching, or helps with positioning or balance will also have this benefit.

**Massage Ball Pack**  
20 different balls in a drawstring bag.  
**3MSBP**

**Tactile Mitts**  
8 Mitts, 8 different textures. • 20 x 14cm  
**4TMIT**

**Atom Massager**  
Dual use massager, not only does it feel great, it also lights up and spins around on its feet if you put it on a flat surface. Requires 3x AAA. • 8cm dia

**3HATM**

*Take a more hands-on approach to proprioception. This often misunderstood sense is being developed in both the participants, the "amount" we use in massage is appreciated by those we massage.*

**Wilbarger Brush**  
Especially developed, soft, plastic surgical brush for the Wilbarger pressure therapy. • 9 x 6cm

**4MWLB**

**Foot Massager**

Combines roller balls with vibration, which can easily be controlled by feet. Requires 2x AA. • 27 x 9 x 17cm

**6FTMS**

**Vibrating Massage Kit**

Six battery operated 2 x Animal Massagers, Ting-Ting head massager, Atom Massager, Mini Massager with 5 different massage heads and Massager Hairbrush / Massager. Adult supervision required. Contents may vary - batteries are not included. Requires 11x AA.

**3MAVK2**

**Viperating Snake - Orange Ridged**

Very popular battery-operated flexible vibrating snake. Allows the user to move the vibration behind their back. Choice of 2 speeds. Orange. Requires 2x C. • 120cm

**3STVS**

**Viperating Snake - Blue Smooth**

Requires 2x C. • 120cm

**3STVSB**

**Vibrating Snake - Green Ridged**

Requires 2x C. • 120cm

**Vibrating Snake Cover - Green**

A soft washable (warm water drip dry) fleece cover for your Vibrating Snake (sold separately). • 125cm

**3SKCVG**

**Snake Skin**

The skin slides over the Viperating Snake (not included) and adds a tactile dimension. Washable and non-shrink.

**3SKSK**

**Neck Massager**

Fits snugly and delivers a vibrating massage. Requires 2x AA. • 31 x 30cm

**6NKMG**

*Proprioception provides us with information regarding the position, orientation and location of our body and its parts - a subconscious body map. An efficient map leads to better orientation, better coordination of our movements and helps us maintain posture and balance. Vibration is highly stimulating to our proprioceptive sense.*

**Vibrating Hair Brush**

2 speed vibrating plastic hairbrush. Reverse side is moulded for massage. Requires 2x AA. • 7 x 21 x 3cm

**3VBHB**

**Jiggy Leopard**

Squeeze the soft cuddly Snow Leopard and he will shake with pleasure. Requires 2x AA.

## Squease | Proprioception

Squease is an adjustable & light inflatable deep pressure vest that applies deep pressure evenly across the torso. Worn discreetly like a thin waistcoat it can be inflated to provide delicious deep pressure, and deflated when the moment has passed. Children can go to sleep in the Squease; it is not very hot.

Squease is available in 3 adult sizes (see sizing chart) and 2 child sizes.

*Weighted products can help us get back in control of our senses. The very real application of weight increases stillness, calmness. Feel the comfort and sense of security that can be afforded by the hug of a weighted blanket, scarf, belt or snake.*

**11lb Weighted Quilt**  
 Now with lots of lovely cooling vents. There are no seams in our Weighted Quilt. There is nothing to pick at and nowhere for germs to hide. Perfect where infection control is required it is also very easy to wash in the home environment and dries quickly. Can be cleaned with 1,000 PPM active chlorine. 5kg. • **142 x 84cm**

**4WTQT**

**8lb Weighted Blanket**

Our weighted Blankets are filled with silicone beads. Silicone beads are very dense so our blankets are thin for their weight. Our beads are very small so they do not feel or sound granular (reducing tactile and auditory stimulation) leading to a better night's sleep. Choose from 4 weights - the general consensus is that the blanket should weigh about 10% of the user's own weight. There are 8 edge loops connecting the inner (which can be washed) to the luxurious cover which is much easier to wash. 3.6kg. • **150 x 100cm**

From being wrapped in swaddling blanket, to being tucked in at bedtime – “Sleep tight!” – to pulling a top tight around shoulders against a dark evening, there is something inherently comforting and calming about being tightly wrapped. Think of it like white noise or a blank canvas for your proprioceptive sense. Weighted products employ ‘Deep Pressure Touch Stimulation’, steady proprioceptive stimulation that balances other sensory “noise”, reducing distraction and the craving to self-stimulate.

**Ball Blanket**

Our deeply calming Ball Blanket has no seams and is made from in hospital-grade bedding material. Very easy to thoroughly clean. • **142 x 82cm**

**Pea Pod**

A deep-pressure inflatable vegetable. Designed by a therapist, in durable vinyl. Perfectly calming with clear spatial boundaries. • **152cm**

**9PEPD**

The VESTIBULAR sense is a key element in sensory integration therapy.

Children and adults who are sensory challenged will often use toys that spin or bounce to stimulate their vestibular system - or their inner ear. The inner ear helps with balance and lets the body know when, and how fast, it is moving.

Some of our favourite vestibular activities involve playground accessories such as swings, trampolines, bouncers, and rockers. These recreational activities are self-paced and fun, making them ideal for both stimulating the under-responsive child and calming for the over-responsive or sensory seeking child.

*We are well known for our swing frames and accessories. These are not the cheapest frames but they are very high quality. TFH frames are made from 2" O/D galvanised steel with nylon swing bearings. The wide splay of the legs, in relation to the frame height, and the long hooked stakes give maximum stability.*

#### **Single Swing (Frame only) Invisible**

Our strongest frame, recommended for the Adult seats. Included with the Wheelchair Platform Swing. 150kg max.  
• H: 228 x W: 226 x D: 245cm

**8TSFS**

#### **EN1176 Certified Single Frame**

Perfect for use by Schools, Hospitals, Nursing homes and other Institutional settings. Councils or other bodies considering our EN1176 certified Frame for a public playground must take further advice as they are not built to withstand vandalism.

**8SIFX**

**Sensory Integration Frame**

Create an weight-bearing suspension playspace anywhere, inside or out. Balancing, climbing, swinging and swaying are fun activities that children want to engage with and provide significant motor challenges and sensory feedback, the basis of Sensory Integration Therapy. Active movement in space is a core component of play, enabling children to learn about their bodies and nature's laws, influencing all other areas of their development. The SI Frame requires no wall or ceiling mounting and can be placed securely on the floor with no mounting points. Fully Galvanised it comes with ground anchors for use outside. PLEASE NOTE : The price is for the frame only - EXCLUDES MAT, FEET AND SWING - These are for illustration purposes only but can be purchased separately. • 240 x 240 x 240cm

**Feet for Indoor Swing Frame**

Turn your Swing frame ( not included ) into an Indoor frame with the addition of 4 levelling feet.

**8TSFTN**

**SI Flying Carpet**

Float on calm seas with our exciting new fabric surface. A little bit of wobble goes a long way in developing confidence. Opens new horizons for Sensory Integration Therapy. Frame not included.

**8SGFC**

*Ever since Jean Ayers identified\* the importance of Sensory Integration (SI), and suggested a link with our vestibular sense, therapists have been including a regimen of swinging and spinning in their programs. It is possible\* that a stimulated Vestibular helps the brain organise and process other sensory input. At TFH we believe in fun, and at this price you can experiment for yourself. \*Sensory Integration and the Child, 1979.\* "An important area for future research is to evaluate Sensory Integration in studies with strong experimental designs. Professionals should present Sensory Integration as untested and encourage families who are considering this intervention to evaluate it carefully" - The Association for Science in Autism Treatment (ASAT).*

**Easy Release Clips Single**

Quickly swap equipment around, immensely strong. • 175kg max

**8TQRC**

**Swivel**

This clever spinning chain-link will silently convert any one of our swings into "spins". 150kg max.

**8SWVL**

**Slide Adjuster**

Easily adjust the height of a swing with this mountaineering tech.

**8SLAJ**

**Hoister**

Raise and lower 4 times the load with this compact block and tackle. Riders may even be able to hoist themselves up (though lowering requires an angle unavailable from the swing). Tip: when working with heavier users employ a beanbag and you only need to raise the rider a smidge to remove the support. • 270kg max

**8HOIST**

**A Pair of Polo Brackets**

**BOSGK**

**Carabina**

One-handed sprung loaded carabiner. • 175kg max

**8CARA**

**Cocoon**

The calming effects of this darkened safe space promote the sensory benefits from deep pressure and vestibular stimulation. Includes a set of balls. Works best with a Swivel. • 50 x 160cm, 90kg max

**8EMCC**

**Taco Swing**

Easy to get in and secure once there. A good way to grade exposure to movement in the wary. 75kg max. • 132cm long

**8TACO**

**Sling Swing**

The give in the soft fabric is an opportunity to experiment with body position and promote integration between the vestibular and proprioceptive senses. Works best with a Swivel. 90kg max. • 104 x 56cm

**8EMST**

**String Swing**

The soft webbing swing cradles the user with a deep pressure squeeze. Includes Easy Release Clips. 65kg max. • 198 x 99cm

**8TNTS**

**Helicopter Swing**

Padded slings allow you to experiment with moving arms and legs in a horizontal position, while potentially developing movement and planning skills. Works best with a Swivel. • 90kg max

**8EMHL**

**Tortilla Swing**

The bunches in this soft sided sling swing creates gentle resistance to body movement. 75kg max. • 132cm long

**8EMTC**

**Deep Fabric Coracle**

A suspended ball pit providing light and deep touch in combination with vestibular input and resulting in lots of opportunities for playful fun. 90kg max. • 125 x 50 x 160cm

**8EMFC**

**Thin Bolster Swing**

Provides challenge to vestibular system when sat astride both in terms of movement and maintaining an upright posture. • 20 x 110cm, 90kg max

**8EMBLT**

**Square Bolster**

This swing allows vestibular stimulation to be given with a stable base of support; proprioception may be incorporated by encouraging pulling to create movement. • 150 x 20cm, 90kg max

**8EMBLQ**

**Half Pipe Bolster**

Hanging upside down from the halfpipe bolster stimulates proprioception in the arms legs and core muscles; more challenging than the square bolster. • 16 x 90cm, 90kg max

**8EMBLH**

**Carpeted Circular Platform**

The shape creates areas of instability increasing the challenge and the requirement for planning. • 75cm dia, 90kg max

**8EMCP**

**Small Square Platform Swing**

Vestibular stimulation can also be used in prone to enhance the ability to extend against gravity. Works best with a Swivel. • 75 x 75cm, 90kg max

**8EMPLS**

**Double Trapeze**

Strength, planning and balance challenges and opportunities for inversion. Works best with a Swivel.  
 • 60cm, 90kg max

**8EMDT**

**Vertical Bolster**

This may be used to encourage planning, bilateral skills and proprioception when used as a swing. It can also be used to develop feedback and feedforward skills when swung between two individuals. Works best with a Swivel.  
 • 120 x 20cm, 90kg max

**8EMVB**

**Bungee "Frog" Swing**

For those that love to bounce; do so in different planes and with different body positions. Works best with a Swivel.

**Bouncing Chair**

Every movement of the head results in a little movement in the chair, which in turn moves the head again: vestibular feedback of the very best kind. Such self-generated feedback is at the core of Sensory Integration Therapy. Designed for children up to 6yrs, 20-25kg. Kids under 20kg should order the light version.  
 • 60 x 90 x 80cm high ; seat depth 21cm

**8BOCH**

**Bigger Bouncer**

Larger and stronger for children up to the age of 9. Up to 30kg. • 60 x 90 x 80cm high : depth of seat 27cm

**8BOCHX**

*The Standard and Light Chairs share the same Framework. So when you outgrow the Light you just need to order the Standard cover 8BOCHC.*

**Bouncing Chair Light**

For smaller children up to about 20kgs.  
 • 60 x 90 x 80cm high : depth of seat 16cm

**8BOCHL**

**Bouncing Chair Cover: Standard**

Sits the heavier and taller child a little lower in the frame.

**8BOCHC**

*A little bit of instability. The body responds; engaging the stabilising muscles of the abdomen in order to maintain balance and control and, when that's not enough, all the other muscles and movement skills. So wobbly supports help strengthen, improve flexibility, co-ordination, and body awareness.*

**Rock Around**

The Rock Around is a fun toy to help kids work on balance and coordination skills! Children will enjoy the sense of motion as they twist and tilt on the Rock Around. There is even room for two smaller children to sit in it together. Encourage kids to spin and rock, or let them have fun and move in whatever way they like! The rocker has an ergonomic rim which prevents fingers from being pinched between the disc and the floor. A great activity to strengthen gross motor development and core stability. Suitable for indoor or outdoor play.

## Spinning | Vestibular

Gross motor skills and the progression of their development enables a person to be in control of their larger muscles. Much focus is placed on torso strength and control as it is the "centre of control" for the rest of the body. Fine motor skills enable precise motions, like picking up small objects, twisting knobs. Gross motor is more physical activity, whereas fine motor incorporates mental and muscle to complete tasks.

### **Whizzy Dizzy**

This spinning disc is self propelled. The central disc provides a place for pulling yourself around as fast as you dare. 40kg Max. • 30 x 50cm dia

• 7cm dia

**3XCXB**

A Switch is a product that you plug into a Reward to "Activate" it. To "Operate" the Switch you have to perform a task, like squeezing the Squish Switch. Most rewards are Activated only while the Switch is being Operated: such a relationship is called "Momentary". Everyday light switches are on/off, or "Latched", staying on until you perform another task. The third type of switching is "Timed"; think of a toaster - you switch it on and after a while it switches itself off. Timed Switches often incorporate an adjustable timer allowing you to decide roughly how burnt you want your toast, so to speak. A Switch/Reward is a product that incorporates both the Switch and the Reward; these can be particularly useful in introducing and transferring Cause and Effect, especially if the reward can later be switched off and a remote reward plugged in.

**Penguin Race**

The animals ascend the tower and trundle down the slide. Requires a Switch (not included). Requires 1x D. • 7 x 23 x 20cm

**3XTPH**

**Big Mack Switch/Reward**

**8GTCT**

Our senses are important, they help us process and understand our surroundings and daily situations through touching, smelling, seeing, hearing and tasting. A Multi-Sensory Environment (MSE) is a source of control and empowerment for either relaxation or stimulation of our senses; it is a safe place to explore a sensory world.

Multi-Sensory equipment provides environmental control. This is why MSE's are known to produce a wide range of positive results in people with alternative and special needs who often depend on others. Installing an MSE will positively affect both care-giver and client. Every staff member can be easily trained to use the MSE safely.

TFH consultation and design will help you get the most from your budget and space. Have us involved as early as possible in the design phase; we provide free valuable advice to architects, builders and especially electricians.

At TFH we have been designing and installing Multi Sensory Environments (MSE) for over 25 years in a variety of settings including schools, hospitals, and private homes.

While every Multi Sensory Environment is designed to suit our clients' requirements, the goal is always to provide a safe and rewarding environment within which the normal rules do not apply.

Rich sensory spaces react to the user, allowing individuals to affect and even control their world.

Touch screen technology is rapidly changing the potential of MSE, but a TFH installation will always be simple to use. That's the point!

*Bubble Columns are the visual focal point of a multi-sensory room.*

*A really good Bubble Column has bright controllable colours: its quiet pump is powerful and can be controlled by a user with a switch.*

*Airflow in a TFH Column can also be easily adjusted to effect the mood of the space: a gentle flow is more relaxing; full power is highly stimulating; and 3 pulse patterns make the space come alive.*

*Our columns are all strongly built and thoroughly tested in our UK workshop.*

*They will not leak.*

*We highly recommend the addition of a Security Bracket and if space allows, a Podium.*

## Podiums | MSE

Hide the Bubble Column base and prevent its movement. A padded wooden podium also provides the user with a comfortable place to sit next to the bubble column and fully experience the effects. Podiums also provide an excellent home for a Fibre Optic Light Source. TFH can make podiums in any size or shape, curves cost more.

With mirrored sides and a padded top our podiums are the sturdy stalwarts of the Sensory room. Available in 2 shapes allowing the creation of all sorts of interesting shapes. Our podii also feature a control panel retaining control over the hidden bases. Available in a wide range of colours.

### Genie Cube

Our first computer interfacing switch. Simple to use, simple to set up, but with very exciting opportunities.

**9GCRX**

*Control your MSE with an iPad or iPhone (Bluetooth, no wi-fi required). Connect a Genie Receiver to make your TFH equipment controllable. Genie can change everything with a single button, or offer the user fairly complex control options. In use, control is immediate (there is no time delay). Genie can even control everyday items (like a fan) via Eve. Genie also enlivens our other controllers, changing which items they control.*

### MSE Genie V1.03 DOWNLOAD FROM APP STORE

Available on the App store. Requires at least an iPad 3 / iPhone 4s, older models will not work.

**9GENIE**

### MSE Pixie

Genie's mischievous friend, Pixie wraps Genie-like control into a colour-match game. Change the colour of the room by selecting the colour it is!

**9PIXIE**

*In Quasimodo mode Genie will listen for notes and change the colour of your bubble columns, Fibre Optics (anything with a receiver) when it hears a note. Now our Bells, Wak-a-Tubes & Drums are switches! Also responds to guitars, keyboards and whistling.*

**Video Projector**  
Perfect for our purposes.

**9GTVP**

**Apple TV**

NOT AVAILABLE FROM TFH. You will need to buy an Apple TV to use the MSE TV.

**9APTVP**

**MSE TV**

TFH has a long term MSE plan, and we have made a great stride this year, with the launch of our MSE TV available on the App Store through an Apple TV.

**NEW**

**Colour Wash Kit A - 2m Starter Kit**

2 Interactive strips of light. Easily mounted, they "wash" an area with bright and intense colours. Typically installed in groups on the ceiling or near the top of walls they can also run along the top of padding or be mounted in a podium. A group of 6 can be linked together as one, and will slowly fade from one colour to another through the full spectrum of colours. Alternatively the built-in receiver means that they are ready to be controlled by our controllers or by our iPad app. 12v Power Supply included.

**9CWKA**

**NEW**

**Colour Wash Kit B - 1m Extension**

Add up to 4 Kit B's to a Kit A. 12v Power Supply included. • 1m

**9CWKB**

*Fireworks: Press a colour to send a firework up. The fireworks are somewhat unpredictable, starting from different points, rising to different heights and exploding in different ways. You can send up lots at the same time. Pixels waits a few seconds after your last instruction and then plays back 15 seconds of your display. Tunnels: Your colour choice "grows" from the centre of the screen. Press and hold a colour and it will gradually fill the screen from the centre (in about 12 seconds) or add layers of colours by selecting new colours, that push your previous choices further out. Pixels waits a few seconds after your last instruction and then your expanding pattern begins to collapse back in toward the centre, changing the illusion of movement and reminding you of your choices. Pictures: The sprite moves across the screen, descending each time like a finger on a page of text. Stop it with a colour choice and your colour expands from that point until you stop sending the signal, then the sprite moves on. You can easily create organic displays, and with skill and patience can start to create more deliberate forms. Pixels waits a few seconds after your last instruction and then holds your creation.*

### **Pixels Panel**

Interactive Light show, with 3 modes. Control this magical screen using any of our switches or an iPad. Pixels plays back your recent activity when you stop interacting with it, creating art and making a mark. Also note that unlike most colour choice rewards Pixels rewards multiple selection of the same colour, also Pixels "remembers" your previous decisions. Completely silent operation. 12v Power Supply included. • 55 x 55 x 5cm

The Projector is the heart of a Multi-Sensory Environment, casting gently moving images and patterns onto the walls, floor and anyone in the way. Projection Curtains double the impact of the projector, as the image is projected both on and through the sheer material. Projection Curtains allow you to actually touch the images without casting a shadow, creating a relaxing, almost fluid space, completely surrounded by light. Add a fan to stimulate the curtains or a Panoramic Rotator to send the images flowing around the room and you have created an environment in which the normal rules have changed. Different behaviours will be exhibited; what can you make of them? Both Projectors can be secured to a shelf or to the ceiling by a swivel point that allows the image to be moved while holding the projector safely in one place.

**Super SNAP**

**Sensory Lifestyle**

In this kit, you will find a great selection of toys that are designed to help students engage their senses, regulate their emotions, and learn relaxation techniques through visual, auditory, tactile, and proprioceptive stimulation. Please note that some items may vary.

**9MSEG**

**Sensory Suitcase**

A must for OT's and others working in the community. The Suitcase and Hurricane Column enables the user to take the Sensory 'Room' to the individual rather than the other way round. The sturdy wheeled case contains a wealth of sensory items to both relax and stimulate including an oil effects projector, fibre optic strands, aroma therapy, tactile vibration and much much more.
