Welcome to our 2024 catalogue!

Adults often forget that play is powerful, but it is the most encouraging force known to children.

It is through play that children push themselves, demonstrate abilities and achieve goals. Therefore no one young or old should be prevented from playing.

TFH have been overcoming obstacles to play for 35 years: we curate a catalogue that is translated into 8 languages, our partners distribute in 13 countries and the special needs toys we manufacture are sold in over 100 countries.

Please enjoy our catalogue, its design is aimed at guiding you to the right toy. Everyone is different, but many goals and difficulties are shared, we use those to group our range.

We hope that it will inspire you to get in touch, we need help to improve and we love to hear from you.

Great customer service makes all the difference.

6TRST

Kibo

Truly overcoming obstacles through play TFH are proud to present Kibo. So many electronic toys create annoying bleeps, while musical instruments require a trained operator. Kibo is a musical instrument designed to be played with like a toy. A true fusion of technology, musicology and fun. Kibo is light, tough and cutting edge technology from Italy. Engagingly simple, but fiendishly complex under the hood, Kibo presents 3 forms of music composition to the user through its 8 chunky wooden blocks. These lovely tactile shapes stack magnetically and snap into place on the smooth board pleasingly, and that's when the magic begins. Tap the blocks to play 40 different instruments (just turn the knob to change) in mode one - the harder you tap, the louder they play (it's a musical instrument). Build complex compositions by adding and removing the blocks in mode two - the lower 4 blocks build a bassline, the upper 4 build the harmony. Mode 3 is a combo mode, the top row builds up a melody, while the bottom row allows you to tap out an accompanying beat. Battery powered (~40 hours, recharges like a phone). Rechargeable non-replaceable Battery .

6KIBO

Kibo is of course Bluetooth-driven via app on an iPad (not included). The App (kodaly) is free to download & requires no musical training. Kibo is a true MIDI controller and can therefore be integrated into other (more complex) apps like Garage Band, Beat maker and Ableton. Some of these apps are free and quite easy to get into. We hope that while Kibo is engaging and educating to play, it will also be a gateway to the truly exciting world of music technology. Play up to 7 Kibos in a group from a single iPad (update in 2021 to allow remote online groups). This multiplayer feature is so simple to set up and use, it's "gold dust". Kibo requires an iPad or iPhone, headphones or a powered speaker for a performance.

Echo Chamber

Sitting on this simple pliant platform is popular because it creates a dished surface on which things roll towards you, and any noise it makes rolling toward you resonates through your body. It will also resonate your voice back to you if you lie on it.

• 120 x 120 x 10cm

9RSEC

Typically we think of music as being 'heard' by the ear, our most sensitive organ to the vibrations in the air. When the notes are very deep we also feel them with our body. Such vibration is the basis of Vibroacoustic therapy. The TFH Resonance Range magnifies musical vibrations so they are felt more easily. All Resonance items require an Amp, our Resonator Amp is perfect.

**Resonance Beanbag**

A beanbag with a beat. The special speaker inside provides strong musical resonance. • 8 cubic feet

9RSCB

**Resonance Cushion**

This Pillow packs a powerful punch. Use it in combination with any other resonance item for a stereo experience. Requires a Resonance Amp 9RSX, better with some Speakers 9SPKR. • 46 x 33 x 10cm

9RSCN

Welcome to the TACTILE chapter!

Our skin is our largest sensory organ. Tickling labels and unfamiliar fabrics can be annoying, and particularly for those who are tactile sensitive.

We believe that exposure to new textures can be fun and that through controlled tactile play we can widen our senses and reduce unpleasant experiences.

Messy play is the ultimate tactile challenge and well worth the effort.

8GHCV

Gravity Sand and Water Table

Highly accessible platform designed specifically to bring together our two most precious things: Children meet water. Shaped to enable seated or wheelchair users get under and "into" the space. Structured around features that enhance some of water's best qualities the Gravity S&W tray requires just 5 litres of water to activate. Riddled with features that encourage creative use of marbles, trains and particularly building blocks. The draining plug can be locked into place (requiring a tool).

8HG20

Water: The most abundant substance on Earth and the source of all life.

Water is weird: its solid form floats on its liquid form (also essential for life on earth), but perhaps oddest of all... water is both safe and fun.

So children should study it and they love to play with it.

Develop your understanding of PROPRIOCEPTION in this chapter.

Proprioception makes up a large part of sensory therapy. But, what is it and how does it work? Proprioception is, essentially, an awareness of one's own body; its movement, balance and how all parts relate to one another.

Products in this section have been chosen for their ability to help with the concept of body awareness. Any product that encourages reaching, or helps with positioning or balance will also have this benefit.

Vibrating Kit

Our Vibrating Kit provides a great variety of vibrating items to help people stimulate our proprioceptive senses. Massage Mat (Non-heated), Vibrating Ball, Vibrating Roller, Vibrating Snake, Vibrating Soft Cushion and Vibrating Pillow.

9VBK

Proprioception provides us with information regarding the position, orientation and location of our body and its parts - a subconscious body map. An efficient map leads to better orientation, better co-ordination of our movements and helps us maintain posture and balance. Vibration is highly stimulating to our proprioceptive sense.

Squeeze | Proprioception

From being wrapped in swaddling blanket, to being tucked in at bedtime – “Sleep tight!” – to pulling a top tight around shoulders against a dark evening, there is something inherently comforting and calming about being tightly wrapped. Think of it like white noise or a blank canvas for your proprioceptive sense. Weighted products employ ‘Deep Pressure Touch Stimulation’, steady proprioceptive stimulation that balances other sensory “noise”, reducing distraction and the craving to self-stimulate.

Stay involved always supervise use

The VESTIBULAR sense is a key element in sensory integration therapy.

Children and adults who are sensory challenged will often use toys that spin or bounce to stimulate their vestibular system - or their inner ear. The inner ear helps with balance and lets the body know when, and how fast, it is moving.

Some of our favourite vestibular activities involve playground accessories such as swings, trampolines, bouncers, and rockers. These recreational activities are self-paced and fun, making them ideal for both stimulating the under-responsive child and calming for the over-responsive or sensory seeking child.

We are well known for our swing frames and accessories. These are not the cheapest frames but they are very high quality. TFH frames are made from 2" O/D galvanised steel with nylon swing bearings. The wide splay of the legs, in relation to the frame height, and the long hooked stakes give maximum stability.

8SGFC

Ever since Jean Ayers identified* the importance of Sensory Integration (SI), and suggested a link with our vestibular sense, therapists have been including a regimen of swinging and spinning in their programs. It is possible* that a stimulated Vestibular helps the brain organise and process other sensory input. At TFH we believe in fun, and at this price you can experiment for yourself. *Sensory Integration and the Child, 1979.* "An important area for future research is to evaluate Sensory Integration in studies with strong experimental designs. Professionals should present Sensory Integration as untested and encourage families who are considering this intervention to evaluate it carefully" - The Association for Science in Autism Treatment (ASAT).

Gross motor skills and the progression of their development enables a person to be in control of their larger muscles. Much focus is placed on torso strength and control as it is the “centre of control” for the rest of the body. Fine motor skills enable precise motions, like picking up small objects, twisting knobs. Gross motor is more physical activity, whereas fine motor incorporates mental and muscle to complete tasks.

A little bit of instability. The body responds; engaging the stabilising muscles of the abdomen in order to maintain balance and control and, when that's not enough, all the other muscles and movement skills. So wobbly supports help strengthen, improve flexibility, co-ordination, and body awareness.

Rock Around

The Rock Around is a fun toy to help kids work on balance and coordination skills! Children will enjoy the sense of motion as they twist and tilt on the Rock Around. There is even room for two smaller children to sit in it together. Encourage kids to spin and rock, or let them have fun and move in whatever way they like! The rocker has an ergonomic rim which prevents fingers from being pinched between the disc and the floor. A great activity to strengthen gross motor development and core stability. Suitable for indoor or outdoor play.

Balance is a big skill, relying on big muscles in our arms, legs and trunk and on whole-body co-ordination and control. When it comes to skills it's all about practice; and fortunately such practice is plenty of fun.

NEW

Mindflow Steady Chair

Sometimes stillness and concentration are the perfect study companions. But when the body seems to demand movement our rocking chair might help channel that energy non-disruptively. Quiet and comfortable. • 62 x 45 x 78cm high

8RCKC

A wide range of products that encourage activity creativity and communication with others. Selected to increase confidence and improve self-esteem, overcoming obstacles all while having fun.

Clear Painting Easel

Tough, easy to clean, clear Plexiglas easel with stabilising sucker feet. A simple idea with interesting applications. The two-sided easel allows two artists to combine their talents at the same time, or stick a Renoir on the back (not included) and paint away on top. Markers sold separately.

• 60 x 40cm

4PAEA

Art gives the freedom to express and to share. The artistic process absorbs and transports, displacing pain, anxiety and boredom while promoting fine-motor skills and dexterity.

USB or Requires 6x C. • 30 x 23 x 8cm

3AQRD

A Switch is a product that you plug into a Reward to "Activate" it. To "Operate" the Switch you have to perform a task, like squeezing the Squish Switch. Most rewards are Activated only while the Switch is being Operated: such a relationship is called "Momentary". Everyday light switches are on/off, or "Latched", staying on until you perform another task. The third type of switching is "Timed"; think of a toaster - you switch it on and after a while it switches itself off. Timed Switches often incorporate an adjustable timer allowing you to decide roughly how burnt you want your toast, so to speak. A Switch/Reward is a product that incorporates both the Switch and the Reward; these can be particularly useful in introducing and transferring Cause and Effect, especially if the reward can later be switched off and a remote reward plugged in.

Star Lamp Projector

A spinning light show, stars light up within the toy while colours illuminate the ceiling. This product is switch-adapted to allow on/off control by the person using it. These switches are not included so you can choose the one most appropriate for you. Requires 3x AA. • 14cm

Selected suspendable stuff: Tambourine; Sleigh Bells, Musical Toy, Flexi Ring, Fuzzy Ring, Mirror and Linkets to suspend them all.

8TAAK

Gross motor skills and the progression of their development enables a person to be in control of their larger muscles. Much focus is placed on torso strength and control as it is the "centre of control" for the rest of the body. Fine motor skills enable precise motions, like picking up small objects, twisting knobs. Gross motor is more physical activity, whereas fine motor incorporates mental and muscle to complete tasks.

Carve out a sensory space within a larger room with this lovely curving creation. The Citadwell is both intimate for those inside and easy to supervise from the outside, meaning that users can freely enter whenever given permission. The curved walls can be either mirrored or white inside and out. The Citadwell can easily accommodate any of our Columns and our Fibre Optic Tails, and can therefore be the basis of a Multi Sensory Environment. • 200 x 150cm, 150cm tall

9CTDW

Our senses are important, they help us process and understand our surroundings and daily situations through touching, smelling, seeing, hearing and tasting. A Multi-Sensory Environment (MSE) is a source of control and empowerment for either relaxation or stimulation of our senses; it is a safe place to explore a sensory world.

Multi-Sensory equipment provides environmental control. This is why MSE's are known to produce a wide range of positive results in people with alternative and special needs who often depend on others. Installing an MSE will positively affect both care-giver and client. Every staff member can be easily trained to use the MSE safely.

TFH consultation and design will help you get the most from your budget and space. Have us involved as early as possible in the design phase; we provide free valuable advice to architects, builders and especially electricians.

At TFH we have been designing and installing Multi Sensory Environments (MSE) for over 25 years in a variety of settings including schools, hospitals, and private homes.

While every Multi Sensory Environment is designed to suit our clients' requirements, the goal is always to provide a safe and rewarding environment within which the normal rules do not apply.

Rich sensory spaces react to the user, allowing individuals to affect and even control their world.

Touch screen technology is rapidly changing the potential of MSE, but a TFH installation will always be simple to use. That's the point!

Bubble Columns are the visual focal point of a multi-sensory room.

A really good Bubble Column has bright controllable colours: its quiet pump is powerful and can be controlled by a user with a switch.

Airflow in a TFH Column can also be easily adjusted to effect the mood of the space: a gentle flow is more relaxing; full power is highly stimulating; and 3 pulse patterns make the space come alive.

Our columns are all strongly built and thoroughly tested in our UK workshop.

They will not leak.

We highly recommend the addition of a Security Bracket and if space allows, a Podium.

Podiums | MSE

Hide the Bubble Column base and prevent its movement.

A padded wooden podium also provides the user with a comfortable place to sit next to the bubble column and fully experience the effects. Podiums also provide an excellent home for a Fibre Optic Light Source. TFH can make podiums in any size or shape, curves cost more.

With mirrored sides and a padded top our podiums are the sturdy stalwarts of the Sensory room. Available in 2 shapes allowing the creation of all sorts of interesting shapes. Our podiums also feature a control panel retaining control over the hidden bases. Available in a wide range of colours.

9GENIE

Control your MSE with an iPad or iPhone (Bluetooth, no wi-fi required). Easy to use and understand, the MSE Genie app can change all our Rewards with a single button, or offer the user fairly complex control options. Genie can also enliven our Colour Controllers, changing which items they control, in a fun sort of internet of things.

In Quasimodo mode Genie will listen for notes and change the colour of your bubble columns, Fibre Optics (anything with a receiver) when it hears a note. Now our Bells, Wak-a-Tubes & Drums are switches! Also responds to guitars, keyboards and whistling.

NEW

Power Controller

Pairs automatically with our Bluetooth kit and allows you to switch it on and off conveniently from a single place, without the need for expensive electrical work. In an MSE It's important not to have everything on all the time, our Power Controller makes it much easier to handle this. The Power Controller is also very helpful in enabling you to Sequence your equipment. Deliberately sequencing your equipment is fun and gives an enhanced level of control which your students may love.

The Projector is the heart of a Multi-Sensory Environment, casting gently moving images and patterns onto the walls, floor and anyone in the way. Projection Curtains double the impact of the projector, as the image is projected both on and through the sheer material. Projection Curtains allow you to actually touch the images without casting a shadow, creating a relaxing, almost fluid space, completely surrounded by light. Add a fan to stimulate the curtains or a Panoramic Rotator to send the images flowing around the room and you have created an environment in which the normal rules have changed. Different behaviours will be exhibited; what can you make of them? Both Projectors can be secured to a shelf or to the ceiling by a swivel point that allows the image to be moved while holding the projector safely in one place.

Musical Squares with Floor Pad

This popular gross motor switch system features 2 speakers and incredible stereo sounds. There are 8 different sound worlds including Transport, Weird Sounds and Silly Sounds. Comes complete with a softplay floor pad switch. 12v Power Supply included. • Pad: 90 x 140 x 8cm, Panel: 92 x 60 x 17cm

9MSQR

Musical Squares with Wall Pad

Comes complete with a Wall-mounted softplay switch pad. • Pad: 100 x 60 x 8cm, Panel: 92 x 60 x 17cm

9MSQRW

Ladder Lights

Always popular because of its simple and dramatic display of sound intensity. Bright and simple transformation of sound into light. 12v Power Supply included. • **110 x 41 x 11cm**

9NLLL

Ladder Light Masks

3 magnetic fascias to spice up the rungs.

9NLLM

Sound Light Dome

Mounted neatly in a suspended ceiling this brilliant dome changes colour in response to sound. The colours actually relate to the pitch of the sound so whistling produces a different colour to humming. 12v Power Supply included. • **60cm square**

3SOLD

Dome Podium

Mounted in our podium the users can get close to the gently swirling colours. • **120 x 120 x 45cm**

3SOLDP

Sound & Light Panel

Each colour represents a different pitch. The deepest bass sounds glow red, higher pitched sounds illuminate orange, yellow, green and finally blue and purple for the treble. The brightness of the lights varies with the volume of sound. May be activated either by music or voice, with microphone and sound-sensitivity control included. 12v Power Supply included. • 60 x 60 x 10cm

9SLPL

Infinity Tunnel

This popular sound sensitive illusion which gives an impression of infinite depth, has been given a technological overhaul. The different modes now enable different colour and pattern responses. Some modes require noise for any action, while others "play" even in quietness. Did you know - by pressing the screen you can bend the tunnel of light? 12v Power Supply included. • 72 x 60 x 10cm

9NLIP

Padded Bubble Table

A new perspective on bubbles. Fully controllable bubbles behind a thick "glass" panel. • 80cm dia, 120cm square

Scent Diffuser

Powerful and low-maintenance Diffuser. Most Aromatherapy Diffusers rely on significant human input, it's part of the fun really, choosing the oils and setting it all up. This is more of a Set-and-forget machine, because even the best Sensory Rooms can sometimes smell a little off-putting, and all of them require human to human engagement. Requires setting up (once) using the simple App so that it runs only during sensible times. Then let it run. A large bottle (250ml) of scent and sensible diffusion settings mean monthly maintenance at most, you might get much longer. Consider buying additional units for scent variation, using more sophisticated settings in the App. 12v. • **13 x 18 x 8cm**

9SCDF

NEW

Scent Diffuser Security Bracket

Our Scent Diffuser contains liquid oil which should not be ingested or spilled or rubbed into the eyes. It might contain a full 250ml of oil. Make sure that no one can get at that oil without a tool with this Bracket. (The Scent Diffuser should also be installed high up).
